About Me

I am a third-year Computer Science student at UAM in Poznań. I have **4 years of commercial experience** in **developing websites** and **front-end applications**. I focus on creating accessible and responsive user interfaces using the latest web technologies.

Competitions

- **2nd place at HackYeah** – the largest stationary hackathon in Europe. [\[link\]](#)
- **Co-organizer of Ultimate Hackathon Mission 3.0** – a hackathon with 50+ participants. [\[link\]](#)
- **3rd place at Smart City Poznań Hackathon** – an event dedicated to waste segregation solutions. [\[link\]](#)

Experience

Middle Frontend Developer

Crehler Sp. z o.o.

08/2023 - now

- Development of e-commerce platforms (**Vue 3, Nuxt 3, TypeScript, Tailwind CSS, Shopware Frontends**).
- Taking on the role of **Frontend Lead** – setting coding standards, mentoring the team, establishing best practices, and making key architectural decisions crucial for the project's frontend development.
- Ensuring architecture, code quality, and testing (**Vitest, Percy**) while efficiently implementing solutions in an Agile environment (daily stand-ups, sprint planning).
- Managing design consistency and UI implementation with **Figma**.
- Regular client communication via **Jira, Zoom/Meet, email** to define requirements and sync progress.

Junior Frontend Developer

Wunderman Thompson Technology

06/2022 - 08/2023

- **Development and maintenance of web applications**, implementing new features using **Vue 3, React, and TypeScript**.
- **Working in an Agile environment** – daily stand-ups, **task estimation**, and collaboration with QA teams to ensure high-quality code.
- **UI/UX implementation**, close cooperation with designers in **Figma**, and collaboration with the product team in Miro for planning and requirement analysis.
- **Ensuring accessibility (a11y) and application performance**, unit testing (**Jest, Vitest**) and integration testing (**Cypress**).
- **CMS integration and development (AEM, Sitecore, ContentStack)** to align components with business requirements.

Junior Frontend Developer

eCreo Multimedia Maciej Roszak

09/2021 - 02/2022

- Development of responsive websites using **HTML, SCSS, Bootstrap 4/5, and JavaScript**.
- Integration and configuration of components in the company's CMS, ensuring proper functionality using **PHP and MySQL**.
- **UI implementation** based on **Figma, Adobe XD**, optimizing performance and responsiveness (**RWD**) across different devices and browsers.

Junior Frontend Developer

BC Software Sp. z o.o.

11/2019 - 04/2020

- Development of a web application using **Angular 8** with **Angular Material** and **RxJS**.
- Implementation of dynamic charts using **Chart.js**.
- Multi-language support implementation (**Angular i18n**) for German and English users.
- Improving user interaction and ensuring cross-browser compatibility.
